Art Unit: 2651

1. This Office action is in response to papers filed 18 July 2003, 15 August 2003, and 6 December 2004, which papers have been placed of record in the file.

2. Claims are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Claims 1 and 12 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a method for estimating voice coil resistance comprising, and a machine readable medium having instructions stored thereon that when executed by a processor cause a system to, estimating voice coil resistance based on a voltage and corresponding current determined during a seek operation, and on a voice coil velocity value based on servo information read during the seek operation, as presented in the environment of claims 1 and 12. It is noted that the closest prior art, Ryan et al., shows voice coil motor voltage calibration similar to the claimed invention. However, Ryan et al. fails to disclose estimating voice coil resistance based on a voltage and corresponding current determined during a seek operation, and on a voice coil velocity value based on servo information read during the seek operation as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2651

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The related co-pending applications 10/368,743 and 10/369314 cited by applicant have now published as 2004/0160695 and 2004/0160698. Codilian et al. Figures 5-12, Moon et al. Figures 3-4, and Male Figures 1B-2 are similar to applicant's invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James L Habermehl whose telephone number is (703)305-6975. The examiner can normally be reached on 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on (703)308-4825. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
